Scaler Detector

User Guide

Scaler Music

Table of Contents

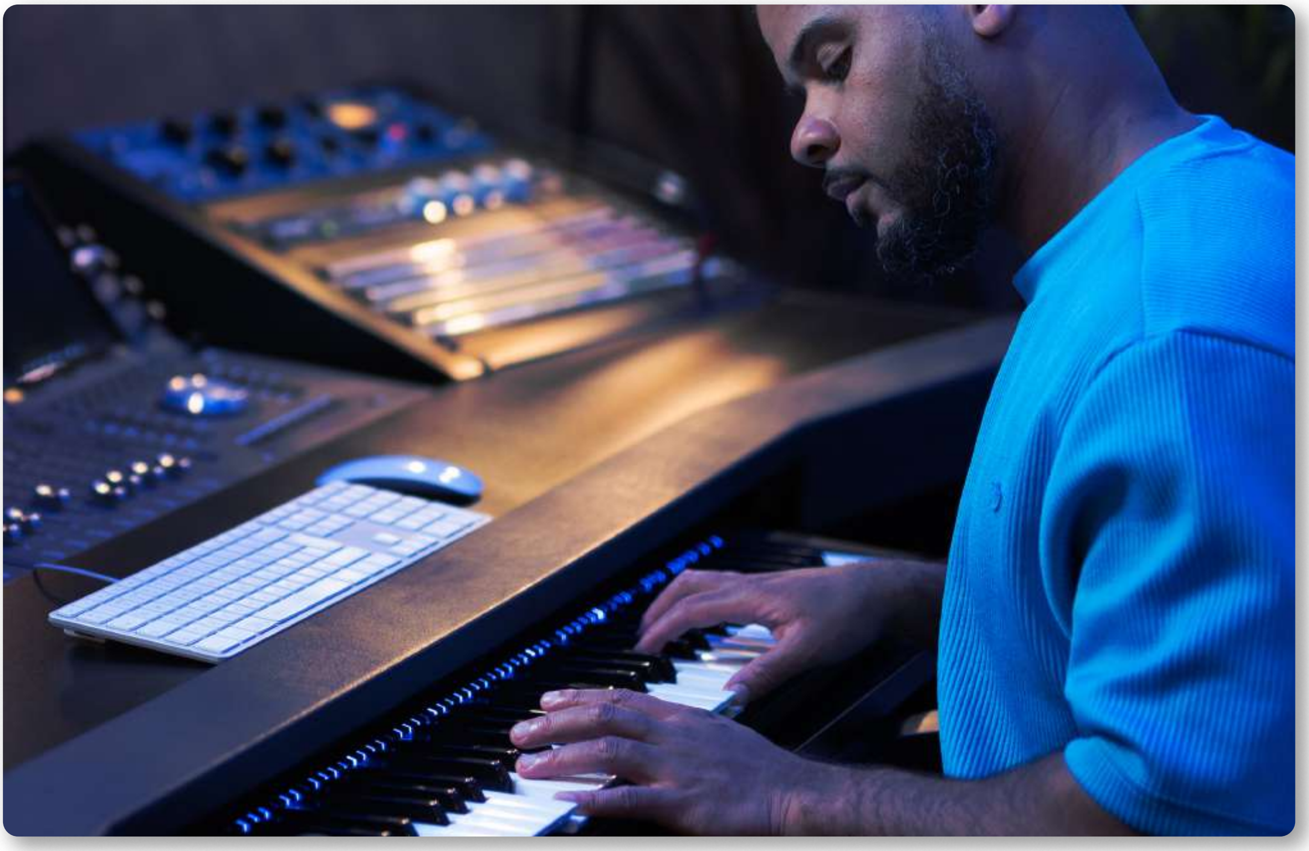
Introduction

Disclaimer

Scaler Detector

Scaler Detector is a standalone and VST/AU/AAX plugin built to tell you the musical key of whatever you play it.

Discover the key of your whole song, an individual polyphonic audio track, or a raw stream of MIDI.



Learning Resources

In addition to this guide, the Scaler Music YouTube channel and the School of Synthesis YouTube channel offer a wide range of tutorials, how-to and guided videos, and creative walkthroughs.

Furthermore, the Scaler Music Forum hosts a vibrant and supportive community where users can seek help and share insights.

Installation & Registration

Downloading Scaler Detector

Scaler Detector is available from either Scaler Music or Plugin Boutique. For details on redeeming your license and accessing the installer, refer to the instructions in your Scaler Music or Plugin Boutique account.

Once you've downloaded the installer for macOS or Windows, double-click the file and follow the on-screen instructions.

Installing Scaler Detector

During installation, you can choose which plugin formats and components to install—such as VST2, VST3, AU (macOS only), AAX, and standalone—based on your system and preferences.

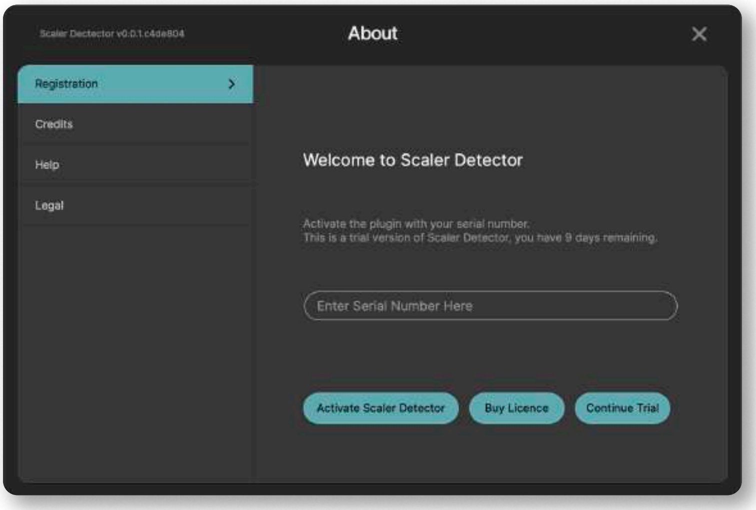
Activating Scaler Detector

On first launch, Scaler Detector runs in trial mode for 14 days with full functionality. After the trial period expires, Scaler Detector must be activated to continue use.

Note: An internet connection is required during activation.

To activate your license:

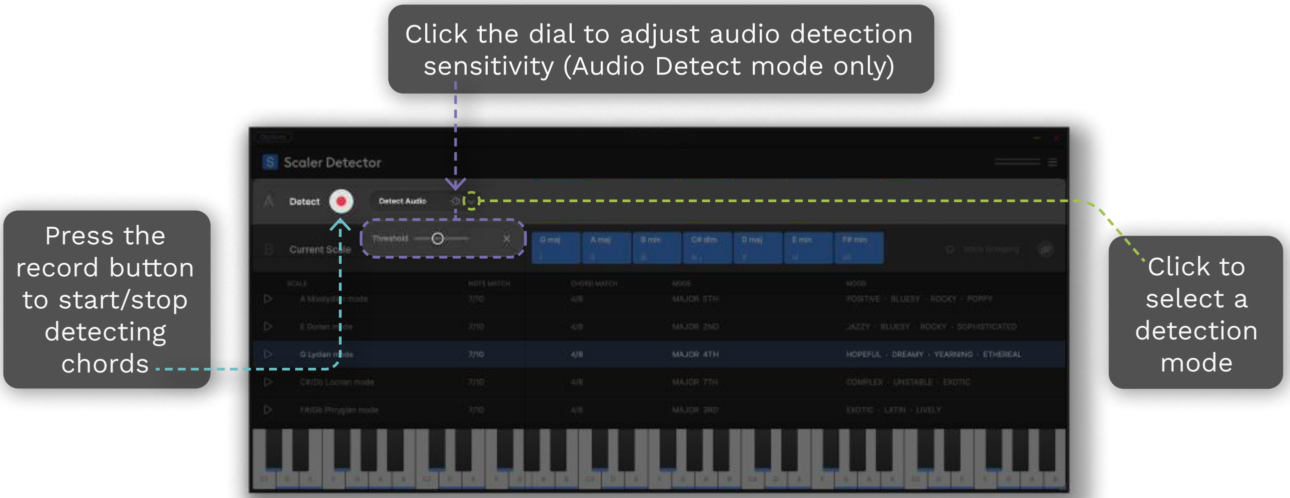
1. Open Scaler Detector in your DAW or launch the standalone version.
2. Click the Scaler Detector logo in the top-left corner and choose Registration.
3. Enter your license code and click **Activate Scaler Detector**.



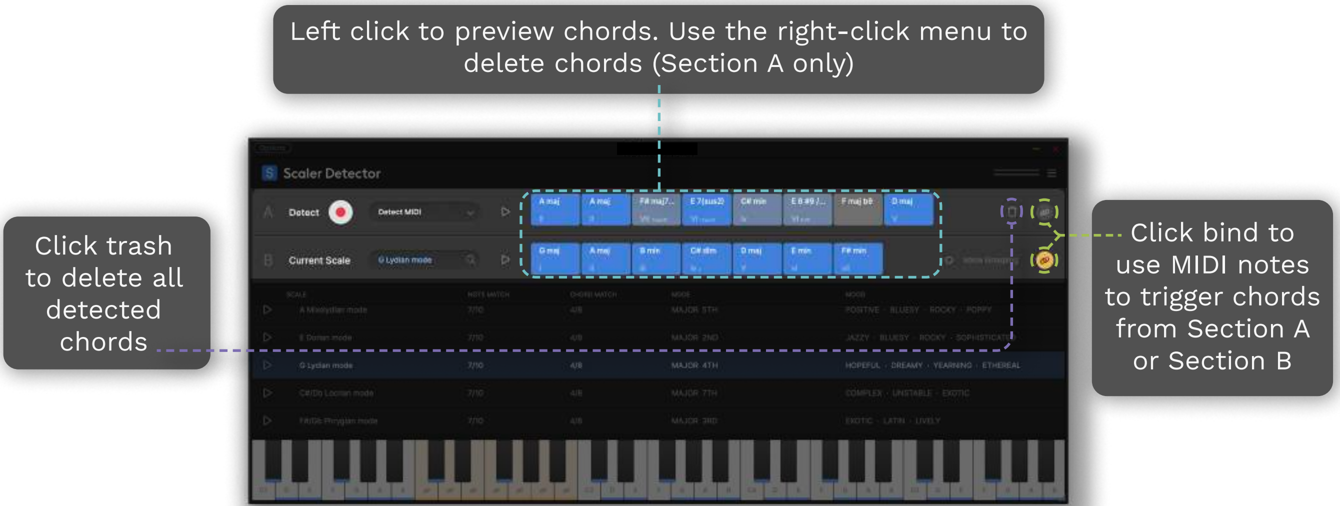
Once activated, Scaler Detector is fully licensed and ready to use—no internet connection or login required.

For troubleshooting tips or help with activation, visit scalermusic.com/support.

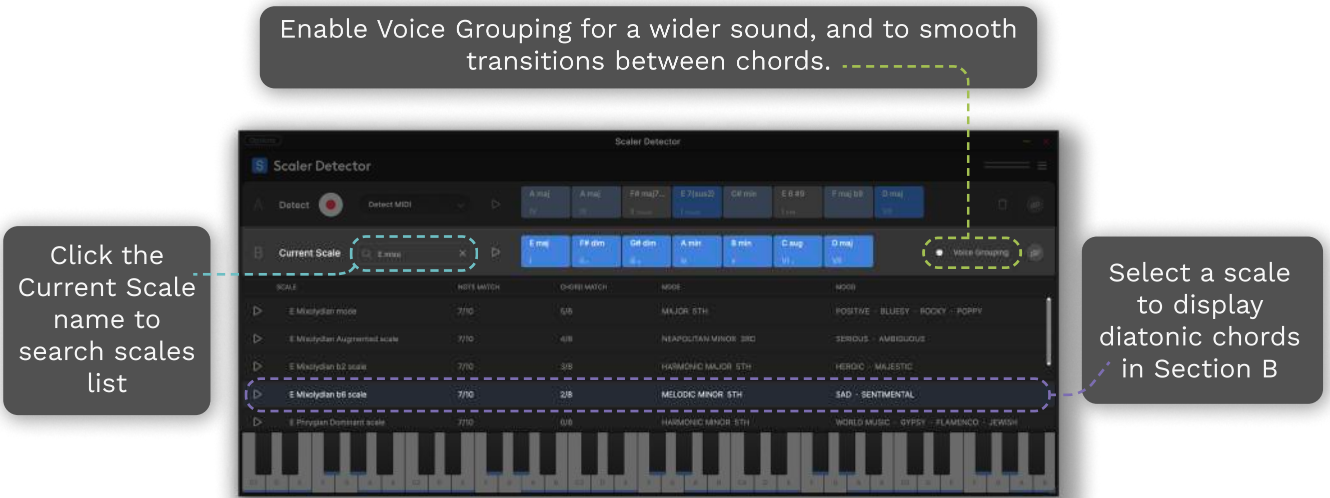
Quick Start



Click the dial to adjust audio detection sensitivity (Audio Detect mode only)
Press the record button to start/stop detecting chords
Click to select a detection mode
Scaler Detector



Left click to preview chords. Use the right-click menu to delete chords (Section A only)
Click trash to delete all detected chords
Click bind to use MIDI notes to trigger chords from Section A or Section B
Scaler Detector



Enable Voice Grouping for a wider sound, and to smooth transitions between chords.
Click the Current Scale name to search scales list
Select a scale to display diatonic chords in Section B
Scaler Detector

Operating Modes

You have the choice of running Scaler Detector as a standalone application, in which it will behave like any other program on your computer. Alternatively, you can use it as a plugin (instrument, audio, or MIDI effect) within your DAW (Digital Audio Workstation) or compatible host.

Plugin Operation

The instrument, audio, and MIDI effect plugin versions of Scaler Detector listed below work with most Digital Audio Workstations (DAWs) and are available in VST, AU, and AAX formats. To start using Scaler Detector, load it onto a software instrument, audio, or MIDI track in your DAW. If you're unsure how to do this, refer to your DAW's manual for specific instructions.

If your DAW organizes your plugins by vendor, you will find the various Scaler Detector plugins listed below under 'Scaler Music'.

Scaler Detector Plugin Versions
Scaler Detector is available in different versions to suit various workflows:

Scaler Detector (Virtual Instrument)
- Designed for use on MIDI/instrument tracks.
- Detects chords from both MIDI and audio input
- Can send MIDI output to external instruments (if supported by your DAW or compatible host)

Scaler Detector Audio (Audio FX)
- Designed for use on audio tracks
- Analyzes and detects chords and scales from audio input
- Ideal for working with pre-recorded audio, samples, or live instruments

Scaler Detector Control
- Designed for DAWs that support MIDI Controlled Effect plugins (MIDI FX*)
- Includes the same detection features as Scaler Detector
- Ideal for controlling external instruments within DAWs that only support AU plugins, such as Logic Pro
- Does not generate sound; requires a separate instrument plugin on the same track for audio output

**Not compatible with all DAWs. Refer to the manual of your DAW for more information on how to route audio and MIDI in your software.*

Standalone Operation

Scaler Detector can also be used as a standalone application, allowing you to work independently of a DAW. Once launched, Scaler Detector will function like any other software on your computer. You can configure audio and MIDI settings within the application to ensure proper input and output routing. This mode enables you to explore Scaler Detector's features, and experiment with musical ideas without requiring a DAW.

Select **Options** at the top left of the Scaler Detector standalone application to access:

Audio/MIDI Settings

- **Feedback Loop** – When on, audio input is muted to avoid a feedback loop.
- **Output** – Set to your preferred output device. Select "Test" for a tone to confirm the output destination registers sound from Scaler Detector.
- **Input** – Set to your preferred input device.
- **Active Output Channels** – Enable or disable channels.
- **Active Input Channels** – Enable or disable channels.
- **Sample Rate** – Adjust the audio sample rate.
- **Audio Buffer Size** – Adjust the buffer size.
- **Active MIDI Inputs** – Enable or disable MIDI inputs.
- **Bluetooth MIDI** – Enable Bluetooth MIDI connections.

Interface Overview

Header Section. This section provides access to settings, the About menu, reset options for the session and window size, and displays the audio output level.

Section A. This contains the audio/MIDI detection controls, and also displays detected chords.

Section B. This allows you to search for and select a scale, and also play the selected scale's diatonic chords.

Instrument Panel. Play notes and visualise notes of playing chords.

Header Section

About Menu

To access the About Menu, click the Scaler Detector logo at the top left of the header section.

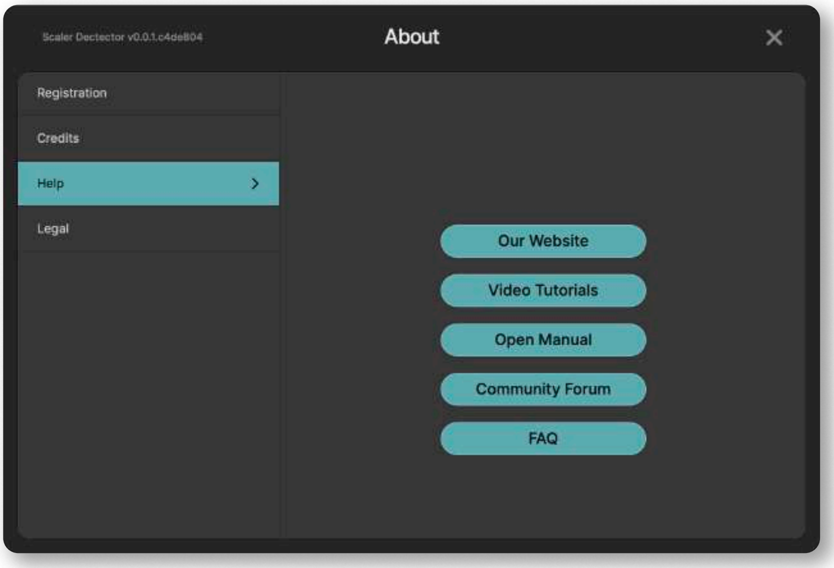
The version of Scaler Detector you are currently using can be found at the top left of the window.

Registration

This is where you can activate Scaler Detector, purchase a license, continue in trial mode, or view the successfully registered status of Scaler Detector. For more information, please visit the Installation and Registration section of this user guide.

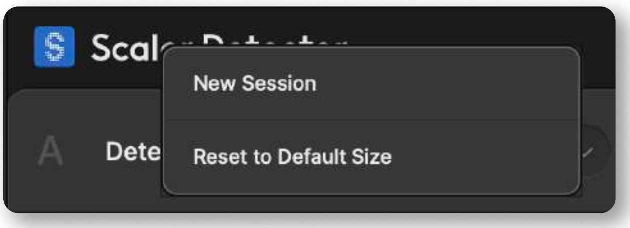
Help

This section includes links to the Scaler Music website, Video Tutorials, User Guide, and FAQ section, as well as the Scaler Music Community Forum.



Right-clicking the Scaler Detector logo displays the following options:

- New Session - Reset the current Scaler Detector session to a blank state.
- Reset to Default Size - Reset to the Scaler Detector window size as if you first opened it.

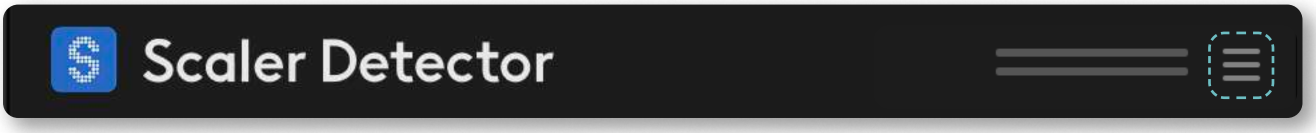


Settings Menu

The Settings Menu in Scaler Detector allows you to customize playback behavior and user preferences to suit your workflow.

It is divided into two sections: **Playback** and **Preferences**

To access the Settings Menu, click the menu icon in the top-right corner of the window.



Playback Menu

Default Velocity
The Default Velocity value determines the velocity at which all chords are previewed when clicked on, or when played using their respective play buttons. This also determines the velocity of chords dragged to your DAW.

Bind Octave
Shift the entire bind range by octaves.

Preferences Menu

Show Tooltips
When enabled, tooltips will appear when hovering over interface elements. Disabling this option hides tooltips.

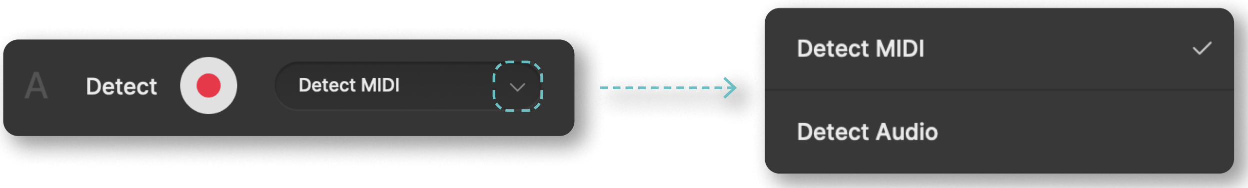
Section A
Detection

Scaler Detector's Detection feature allows you to identify the chords and scales in MIDI or audio material. It analyzes the incoming content and displays detected chords in Section A, with suggested scales shown in Section B. This makes it easy to understand the harmonic structure of a file or performance and explore new musical directions.

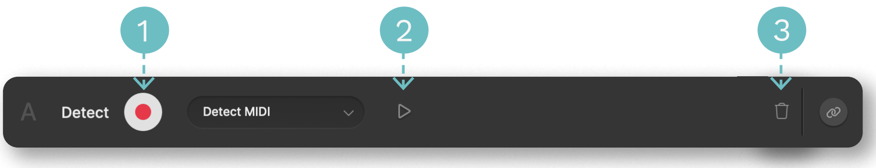
Scaler Detector offers two detection methods:

- **Detect MIDI**
- **Detect Audio**

To select a detection method, click the down arrow next to the currently selected detection method.



Detection Controls Overview



1. Record Button – Starts or stops Detect MIDI, or Detect Audio.
2. Play Button – Plays your detected chords in Section A as a sequence.
3. Trash Bin Button – Clears detected chords from Section A.

Detect MIDI

Scaler Detector's Detect MIDI function analyses incoming MIDI data in real time, or through drag-and-drop directly onto Scaler Detector's interface. As MIDI is received, Scaler Detector extracts chord and scale information, displaying detected chords in Section A and suggested scales in Section B.

To use Detect MIDI (real-time detection)

1. Select 'Detect MIDI' from the drop-down menu in Section A, then click the Record button. The button will flash, indicating that Scaler Detector is actively monitoring incoming MIDI data.
2. Begin MIDI playback from the desired point in your DAW's timeline, or perform MIDI input live using a connected MIDI controller.
3. Scaler Detector will analyze any MIDI routed directly into the track it is loaded on, including MIDI clips on that track or live input from a connected controller.
4. In real time, Scaler Detector displays detected chords in Section A, with corresponding scale suggestions in Section B.
5. When playback or performance is complete, click the Record button again to stop detection. The detected results will remain visible for further interaction, such as binding or deleting.

Note: This method can be used with either the Scaler Detector Instrument plugin on a MIDI or software instrument track, or the Scaler Detector Control plugin in DAWs that support AU MIDI effect plugins.

To use Detect MIDI (drag-and-drop)

1. Drag a MIDI file from your computer onto the Scaler Detector interface.
2. Scaler Detector will automatically analyse the file and display the detected chords in Section A, with corresponding scale suggestions shown in Section B.
   Note: Any existing chords in Section A will be deleted automatically.

Detect Audio

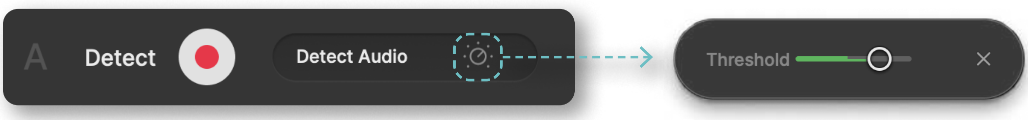
Scaler Detector's Detect Audio function enables you to analyse and extract chord and scale information from audio tracks in real time. As audio content is processed, Scaler Detector extracts chord and scale information, displaying detected chords in Section A and suggested scales in Section B Section B.

To use Detect Audio (real-time detection)

Note: In most cases, the simplest way to detect audio is by inserting the Scaler Detector Audio (Audio FX) plugin directly onto an audio track. However, you can also use the Scaler Detector (Virtual Instrument) plugin by routing audio into it via side chain. Since the side chain setup process varies between DAWs, please refer to your DAW's documentation for specific instructions on how to configure side chain input.

1. With Detect Audio selected from the drop-down menu in Section A, click the Record button. The button will flash, indicating that Scaler Detector is actively monitoring incoming audio data.
2. Start playback from the desired point in your DAW's timeline, or perform live audio through an instrument such as a guitar routed into the track.
3. As the audio plays, Scaler Detector will analyse the content and display the detected chords in Section A, with corresponding scale suggestions in Section B.
4. When you're finished, click the Record button again to stop detection. The results will remain visible for further interaction, such as binding or deleting.

With Detect Audio selected, click the dial icon to open the audio sensitivity threshold controls. If chords are not being detected, lower the threshold to increase detection sensitivity. If too many chords are being detected, increase the threshold to lower the detection sensitivity.



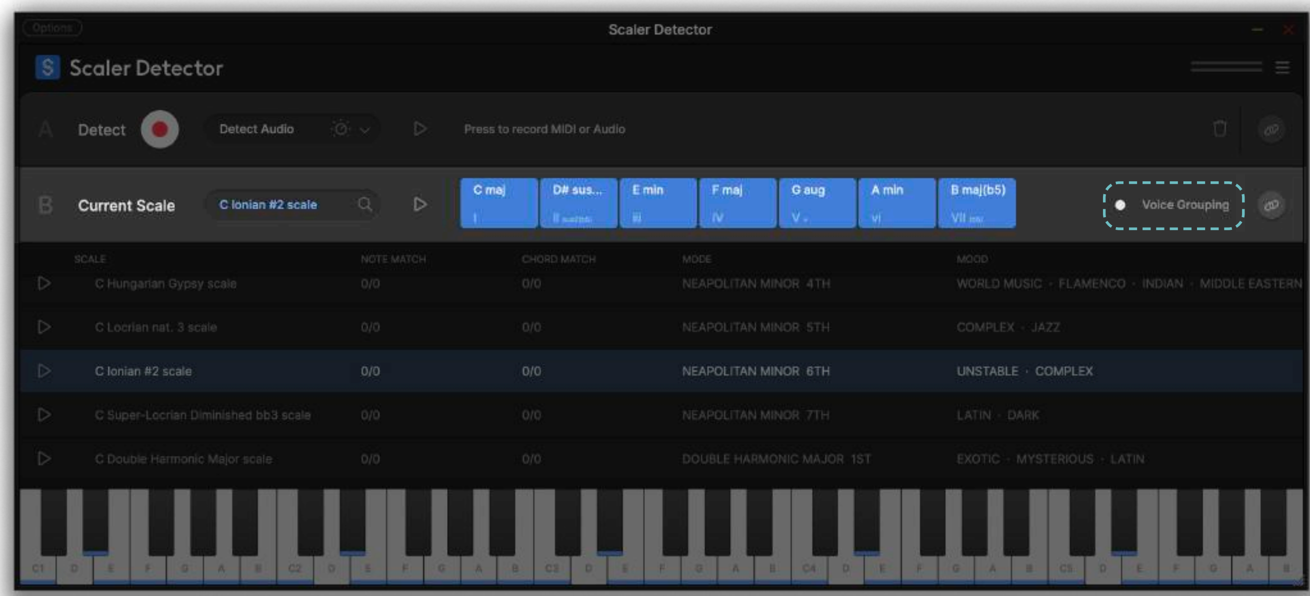
To use Detect Audio (drag-and-drop)

1. Drag an audio file from your computer directly onto the Scaler Detector interface.
2. Scaler Detector will automatically analyse the file and display the detected with corresponding scale suggestions shown in Section B. Note: Any existing chords in Section A will be deleted automatically.

Voice Grouping

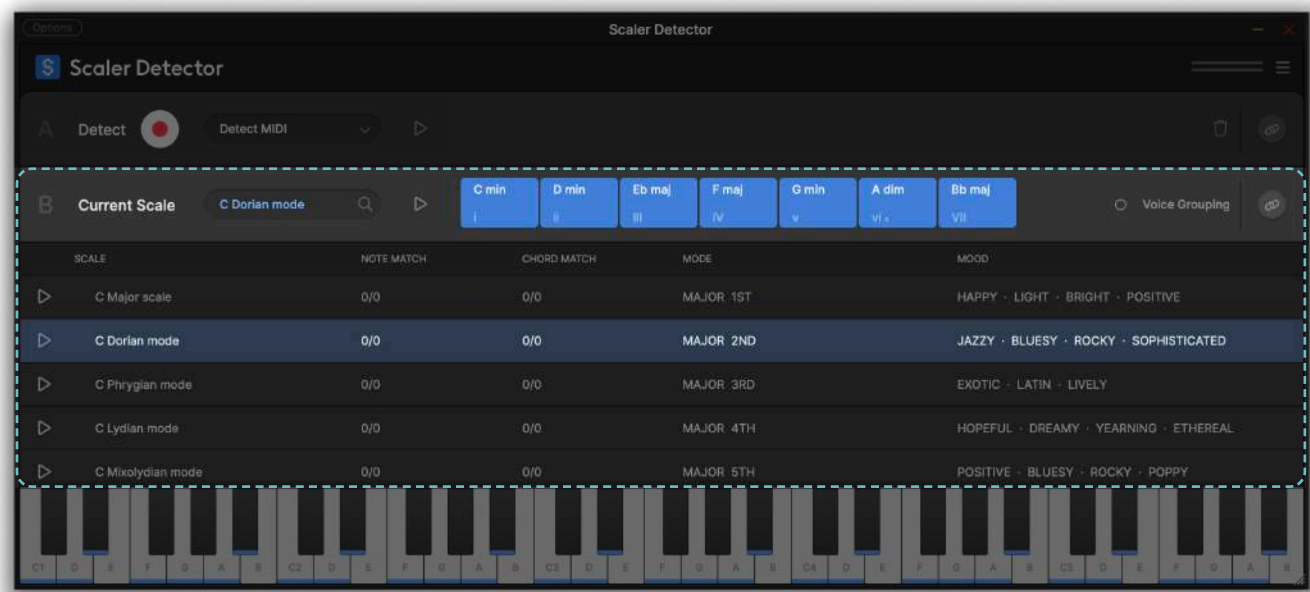
Enabling Voice Grouping in Scaler Detector transforms chords by creating a wider sounding voicing. Voice Grouping also allows for smooth changes between chords by automatically grouping notes around the tonal center of the currently selected scale.

This prevents big jumps when moving from a lower diatonic chord to a higher diatonic chord, such as I > vi (for example, from a C Major to an A Minor chord).



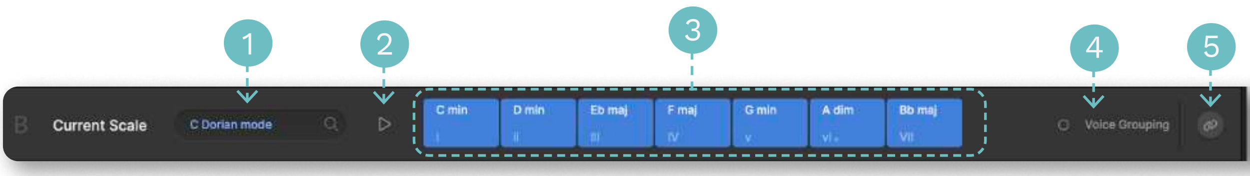
Section B
Current Scale

Section B consists of a header and Scaler Detector's full database of scales.



Section B Header

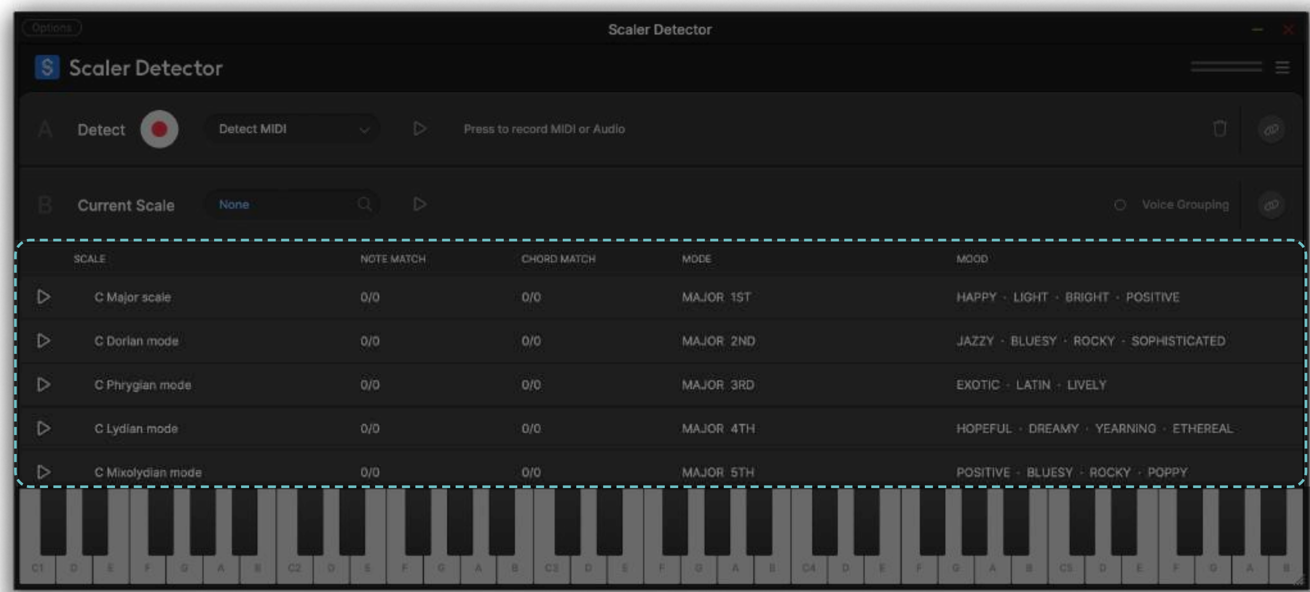
In Section B's header, you can:



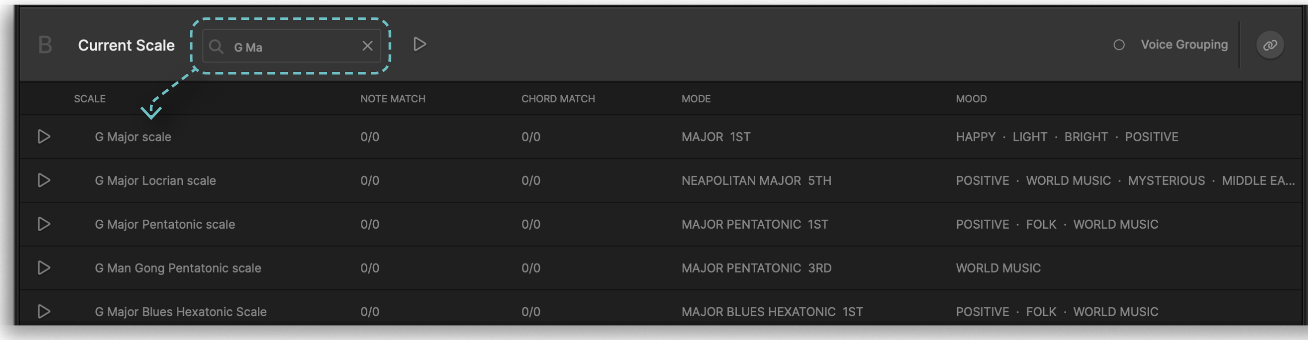
1. View the currently selected scale.
2. Play or preview the diatonic chords of the selected scale in a sequence.
3. View the chords belonging to the selected scale.
4. Enable Voice Grouping for a wider sounding chord voicing.
5. Bind chords from the selected scale to MIDI trigger notes (highlighted in yellow on the keyboard

Scale List

Below the Section B header, Scaler Detector displays its full database of selectable scales. By default, the complete list is shown and can be browsed by scrolling.



The list updates dynamically as you type into the scale search field.



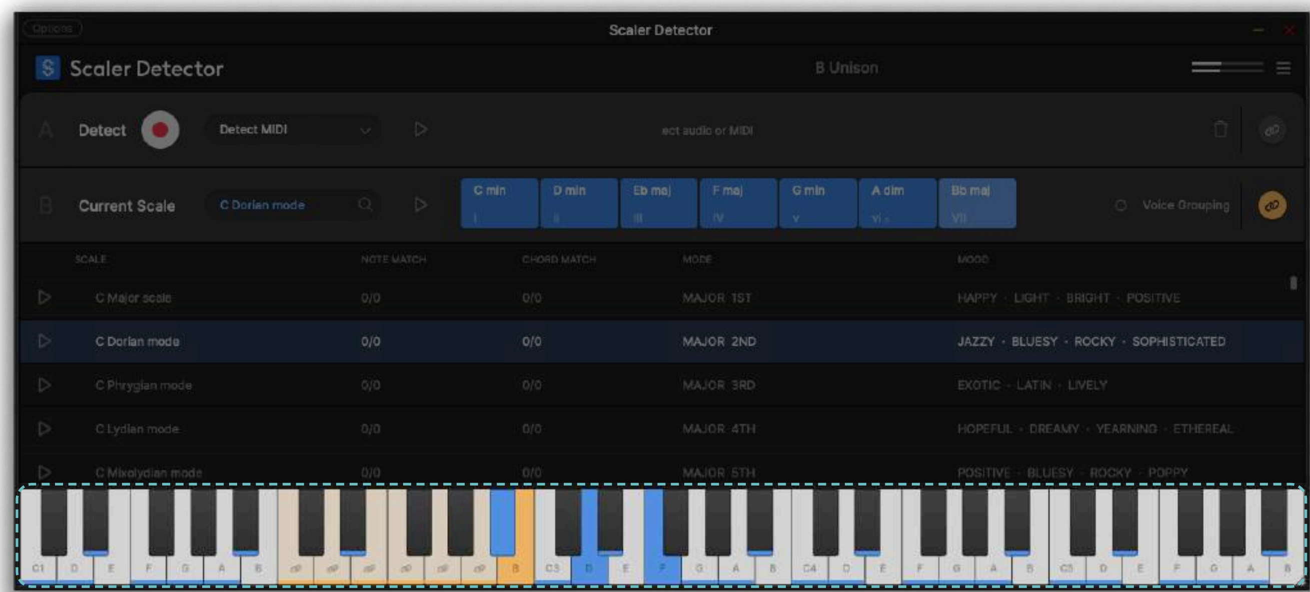
Scales can be played or previewed using the Play button. To select a scale, click anywhere on its row – you will see the Section B header update to reflect your choice.

Each scale is displayed under the following column headers:

- Note Match – The number of notes in the selected scale that match the user's chosen notes (e.g., if you select C, E, and G, this shows how many notes in the scale contain those).
- Chord Match – How many of the chords in the scale match the currently selected chord set or progression.
- Mode – The classification of the scale, such as Major, Minor, Harmonic Minor, etc.
- Mood – A descriptive label that categorizes the scale based on its tonal quality, emotion, or feel.

Instrument Panel

The Instrument Panel in Scaler Detector provides an interactive way to visualize and play sounds using a keyboard interface. It provides a visual reference for scale notes, chord voicings, and key mappings and dynamically updates based on your selected scale and Bind MIDI settings.



- Scale Notes – Marked with blue indicators
- Active Keys – Highlighted in blue when within the selected scale, or grey if outside the selected scale
- Bind Region – Highlighted in yellow, showing active chord binding areas

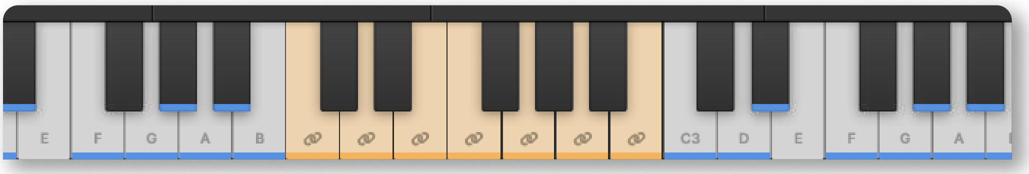
Binding Chords

As well as triggering chords by clicking on them with your mouse, you can also ‘bind’ sections of Scaler’s interface to trigger chords with individual MIDI notes. This is accomplished by clicking the ‘bind’ button to the right of certain rows of chords.

The inactive bind button indicates that its corresponding row or group of chords can be bound and triggered via MIDI notes.

When the icon is highlighted in **yellow** the selected row or group of chords is bound, meaning incoming MIDI notes will trigger the corresponding chords.

Additionally, Scaler Detector’s on-screen keyboard/piano will indicate the bind range by displaying yellow highlights with the bind icon at the bottom of the keys.



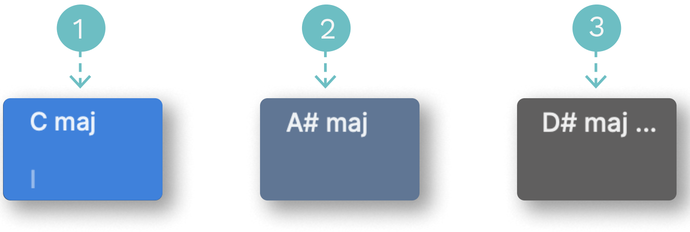
Appendix

Color-Coding System

Scaler Detector uses a color-coding system to display chords and notes based on their relationship to the currently selected scale.

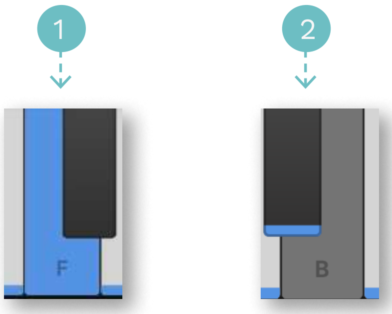
Chords

1. Chords with all notes belonging to the selected scale are highlighted in blue.
2. Chords with one note outside the selected scale are highlighted in light blue.
3. Chords with two or more notes outside the selected scale are highlighted in grey.



Notes

1. Notes that fit within the selected scale are highlighted in blue.
2. Notes that are outside the selected scale are highlighted in grey.



Musical Notation

Scaler Detector uses a compact chord naming convention. The first part of the name is referring to the most general (non altered) part of the chord.

For example, a min7 chord refers to a minor seventh chord made up of a minor third and minor seventh above the root.

The second part are alterations applied to the chord. Alterations are optional and specified between parenthesis. Alterations affect the chord by taking precedence over the pitches that would normally establish the named chord.

For example, a min7(b5) chord means that the expected perfect fifth of the minor seventh chord will be replaced by a diminished fifth, the rest of the pitches remain unchanged.

The third part of the name is the extension. This part is also optional and is separated by spaces.

For example, a min7(b5) b9 is a minor seventh chord with a diminished fifth to which we have added a flat nine.
There can be multiple alterations and extensions to a chord.

For example, a min11(b5 #9) is a minor eleventh chord with two alterations on the fifth and ninth, and a min7 b9 #11 is a minor seventh chord with no alterations but two extensions a flat ninth and a raised eleventh.

Troubleshooting

No MIDI Input
Check that your DAW is configured to send a MIDI signal to the track on which you loaded Scaler Detector. Depending on your software, you might need to select or arm the track you wish to send MIDI to.

No Audio Input
When using Scaler Detector, check that you have routed the audio signal correctly into Scaler Detector. When using Scaler Detector Audio, make sure there is audio content playing on the track.

Chord Progression Sounds Different When Dragged into DAW
Most likely you still have 'Bind' activated in Scaler Detector so you are effectively performing a performance. If you are dragging MIDI to your DAW please turn of 'Bind' in Scaler Detector.

Help and Community

Legal

Scaler Detector End User License Agreement

Permission to use the Scaler Detector software (Software) is conditional upon you (Licensee) agreeing to the terms of this End User License Agreement (EULA). A license to use Software and Additional Materials is offered to you by Scaler Music ACN 6333 215 808 (Scaler) only on the condition that you read and accept all the terms of this EULA and wish to become a licensee of the Software and Additional Materials. Acceptance will bind you and each of your employees to the terms of the EULA. By clicking “I Accept”, you will be deemed to have accepted the terms set out in this EULA. If you do not wish to accept the terms, you must not click “I Accept” and you may not use the Software or any Additional Materials.

1. License
(a) Pursuant to this EULA, Scaler Music grants the Licensee a non-exclusive, revocable license to:

(i) use the Software on the basis of a fourteen (14) day trial license (14 Day Trial); and

(ii) subject to the payment of the License Fee, continue using the Software following the expiry of 14 Day Trial, subject to the terms and conditions set out in this EULA.

(b) The Licensee may install the Software concurrently on up to five (5) computers for the Licensee’s use, but the Software is licensed for use by one (1) person only. An employee of the Licensee may use the Software in carrying out their duties in their capacity as an employee of the Licensee, provided that the Software is only used by that employee and no other person (including the Licensee). For example, if the Licensee is an individual that wishes to use the Software and the Licensee also has an employee that it wishes to use the Software in carrying out its duties for the Licensee, the Licensee will be required to purchase a second license for the employee by paying a second License Fee.

2. License Fee
Following the 14 Day Trial, the Licensee is not entitled to use the Software until the license fee for the Software has been paid (License Fee). The License Fee must be paid in the amount and in the manner specified by:

(a) Scaler where the Software is acquired directly from Scaler; or

(b) the authorised distributor of the Software where the Software is acquired from an authorised distributor of the Software.

3. Additional Materials
This EULA extends to any accompanying documentation, materials and files including, but not limited to the manual for the Software, audio files, sound libraries, third party licensed content, bug fixes, updates and improvements to the Software provided by Scaler in conjunction with the Software (Additional Materials). Where used in this EULA, unless expressly provided otherwise, the defined term Software shall include the Additional Materials. The Additional Materials may not be copied, modified or used in any way not contemplated or expressly authorised by this EULA.

4. Licensee's Obligations
The Licensee undertakes the following obligations:
(a) to not copy, reproduce, translate, adapt, reverse engineer, decompile, vary or modify the Software in whole or in part, except as expressly authorised by this EULA or part III division 4A of the Australian Copyright Act 1968 (Cth);
(b) to supervise and control the use of the Software in accordance with the terms of this EULA;
(c) to ensure its employees who have authorised access to the Software are made aware of, and comply with, the terms of this EULA;
(d) to not provide or otherwise make available the Software or any part of it in any form to any person other than those referred to in paragraph 4(c);
(e) to not give, sell, lease, assign, license, sub-licence, transfer, distribute, disclose, disseminate or publish the Software in any form to any other person or attempt to do any of these acts except as otherwise authorised in this EULA;
(f) to only use the Scaler software in accordance with the manual provided as part of the Additional Materials;
(g) to not develop any derivative or other software program based on the Software;
(h) to only use presets or parts of sound libraries that form part of the Software in the context of musical arrangements, recordings of arrangements and live performances;
(i) to not extract, copy or produce from the Software any single preset, sound or
MIDI files or any assembly of presets, sound or MIDI files for resale, commerciali sation or any other form of distribution or create derivatives of any presets, sound or MIDI files from the Software (including exporting Additional Materials and selling, commercialising or distributing as sample libraries); and
(j) to not use the Software in any way that is illegal or contrary to any laws or regulations, infringes the rights of any third party or is defamatory of any third party.

5. Warranty
(a) The Licensee acknowledges that the Software and Additional Materials cannot be guaranteed error or interruption free or otherwise free from infringement and further acknowledges that the existence of any such errors must not constitute a breach of this EULA by Scaler.
(b) Subject to clause 5(e), Scaler will not be liable for any indirect or consequential loss or damage arising out of a breach of this EULA or arising out of the supply of the Software and any condition, warranty, right or liability which would otherwise be implied in this EULA or protected by law is excluded.
(c) Pursuant to Schedule 2 of the Competition and Consumer Act 2010 (Cth) (Australian Consumer Law), liability for breach of a guarantee conferred by the Australian Consumer Law (other than those conferred by sections 51-53 of the Australian Consumer Law) in respect of any of the goods or services supplied under this EULA which are not of a kind ordinarily acquired for personal, domestic or household use or consumption is limited:

> (i) in the case of goods, to any one of the following as determined by Scaler, the replacement of the goods or the supply of equivalent goods, the repair of the goods, the payment of the cost of replacing the goods or of acquiring equivalent goods or the payment of the cost of having the goods repaired; and
> (ii) in the case of services, to any one of the following as determined by Scaler Music or Plugin Boutique, the supplying of the services again or the payment of the cost of having the services supplied again.

(d) If clause 5(c) does not apply, the total liability of Scaler for loss or damage of any kind:

> (i) arising under this EULA;
> (ii) out of or in relation to the Software, its sale, delivery or the way it operates in tort, contract or in any other cause of action; or
> (iii) in any other way, is limited to the amount of the License Fee paid by the Licensee and any other amounts paid by the Licensee to Scaler under this EULA.

(e) Nothing in this EULA excludes, restricts or modifies any condition, warranty, right or liability implied in this EULA or protected by law to the extent that such exclusion, restriction or modification would render this EULA or any provision of this EULA void, illegal or unenforceable.

(f) The Licensee acknowledges that:

(i) prior to paying the License Fee, a reasonable opportunity has been provided, in the form of the 14 Day Trial Period (irrespective of whether the Licensee utilised the 14 Day Trial Peri od), to assess the suitability of the Software;

(ii) at no time prior to entering into this EULA has it relied on any representation by Scaler or any distributor of the Software regarding the Software or the Additional Materials which the Licensee has not been able to verify, or had the opportunity to verify or investigate (including by way of the 14 Day Trial), independently;

(iii) it is not obliged to continue use of the Software beyond the 14 Day Trial Period; and

(iv) prior to paying the License Fee, it has been given a reasonable opportunity:

(A) to satisfy itself that the Software and Additional Materials corresponds with any representation made by Scaler Music or Plugin Boutique; and

(B) to examine Software and Additional Materials for any apparent defects, and that it has availed itself of that opportunity; and

(v) the Software is provided as is, and Scaler has no obligation to provide the Licensee with updates, upgrades, bug fixes, improvements or supplements to the Software or provide any support services in connection with the Software.

(g) The application of the United Nations Convention on Contracts for the International Sale of Goods (the Vienna Convention) to this EULA (by virtue of any law relevant to this agreement) is excluded.

6. Intellectual Property and Title

(a) The Licensee acknowledges that the Software is the subject of copyright. The Licensee will not during or any time after the expiry or termination of this EULA permit any act which infringes that copyright and, without limiting the generality of the previously mentioned copyright, the Licensee specifically acknowledges that it may not copy the Software or any part of it except as otherwise expressly authorised or acknowledged by this EULA.

(b) You must not during or at any time after the expiry or termination of this EULA permit any act which infringes any of Scaler's trade marks (whether registered or unregistered) used in connection with the Software.

(c) This EULA does not transfer any ownership of the Software to the Licensee. Scaler retains all right, title and interest in and to the Software and any copies of the Software (including all intellectual property rights pertaining thereto).

7. Term of license

(a) The 14 Day Trial commences upon the Licensee's acceptance of the terms and conditions set out in this EULA.

(b) The EULA will continue beyond the 14 Day Trial upon payment of the License Fee and shall continue in effect until terminated in accordance with clause 7(c).

(c) This EULA may be terminated by Scaler in the following circumstances:

(i) if the Licensee is in breach of any term of this EULA;

(ii) if the Licensee, being a corporation, becomes the subject of insolvency proceedings;

(iii) if the Licensee, being a firm or partnership, is dissolved;

(iv) if the Licensee uses the Software in any way that, in the reasonable opinion of Scaler, does or is likely to cause damage to Scaler or bring it into disrepute; or

(v) if the Licensee destroys the Software for any reason.

(d) Upon termination, the Licensee or its representative will destroy any remaining copies of the Software and Additional Materials or otherwise dispose of such material in the manner directed by Scaler.

(e) Termination pursuant to this clause will not affect any rights or remedies which Scaler may have otherwise under this EULA or at law.

8. Limitation of Liability and Indemnity

(a) The Licensee will indemnify Scaler, its officers, employees, contractors and agents fully against all liabilities, costs, charge, claim, liabilities and expenses (including legal expenses) which Scaler may sustain or incur as a direct or indirect consequence of:

(i) a breach of the terms of this EULA by the Licensee (or its officers, employees, agents, representatives or contractors);
(ii) any negligent or unlawful act or omission of the Licensee (or its officers, employees, agents, representatives or contractors); and
(iii) the Licensee's use of the Software except as otherwise provided in this EULA.

9. Privacy
The Licensee acknowledges and agrees that Scaler may collect, use, store and share the Licensee's personal information and usage information in accordance with Scaler's privacy policy, as amended from time to time in Scaler's sole discretion, which is set out on Scaler's website at https://scalermusic.com/privacy-policy/ or such other website or location as notified to the Licensee from time to time.

10. Assignment
The benefit of this EULA will not be dealt with in any way by the Licensee (whether by assignment, sub-licensing or otherwise) without Scaler's written consent (which may be withheld in its absolute discretion). Scaler may transfer, novate or assign its rights and obligations under this EULA to a third party at any time in its absolute discretion.

11. Waiver
Failure or neglect by either party to enforce at any time any of the provisions of this EULA will not be construed or deemed to be a waiver of that party's rights under this EULA.

12. Severability
If any part of this EULA is or becomes invalid or unenforceable, that part is severed from this EULA. Such invalidity or unenforceability does not affect the validity or enforceability of the remaining provisions of this EULA.

13. Survival
Any indemnity under this EULA is independent from the other obligations of the parties and survives the termination of this EULA and any term which is expressed to survive termination of this EULA or any term which by its nature is intended to survive termination of this EULA shall survive the termination of this EULA.

14. Entire Agreement
This EULA and any documents expressly referred to in it (including Scaler's privacy policy and the Software user manual) constitutes the entire agreement between Scaler and the Licensee.

15. Governing law
This EULA will be governed by and construed according to the law of the Victoria, Australia.
Third Party Attribution
This Software may contain third party software components (or portions thereof).
The following legal notices, if any, provide attribution to these software components.

ASIO
ASIO is a trademark and software of Steinberg Media.

VST3
VST is a trademark of Steinberg Media Technologies GmbH, registered in Europe and other countries.
